Green Lane Offices, Walsall

The upper photograph shows the offices as they were when bought by the Company in 1978. Although the core structure remains, the frontage has seen a number of changes over the past 30 plus years.

Walsall Power Station dominated the view towards the south prior to its demolition in 1987. The upper 1978 photograph shows the west end of the building which would become the Central Stores. The Central Workshops were built on the plot adjoining the canal and can be seen on the right hand side of the 2010 photograph below.
